owners and all their employes, added to the miners, include less than 10 per cent, of our working population. We now Republican friends tell us, that make 92 1-2 per cent.—nearly 15-16-of all the manufactured to uphold the great American mines are shut down on the sixth of the time, when their workingmen must eat even solutely prohibited imports and worth of goods they used. there could be no perceptible increase in the number of those to comsume the farmer's prothe invention and use of labor number of workmen required is steadily growing less, though the product is rapidly increaster, laden with flour rolled in ing. It is plain enough, there-

> ket" than he does. This is strickingly illustrated by our experience.

For thirty years the high tariff stimulus has been given to manufacturing industries. They have grown beyond precedent, and if they could have given our farmers a profitable 'home market" and made them independent of foreigders, they must have done 'so. But the fact is the reverse. Adopting the careful calculations of Mr. Davis (which are quoted with with approval by the American Economist, the organ of

kets are found at Liverpool, a and part of which have already few cents per acre to raise and detectives went to the Windsor free trade city-and so he gets been quoted above,) we find market corn in Iowa if the Hotel where the box was given them, too, at free trade rates. that during a period of thirty- farmer was paid for his labor to them. BURGLARS IN IT.

Business House Reileved of

Monday night burglars entered the business house of S. D. Hodge & Co., of this place, and carried Wm. Haydon, ol Lyon county, away a lot of goods. An easy entrance was effected by cutting out a panel of the rear door, reaching an arm through the apature, and with the hand turning the key which was in the lock on the inside. A show case filled with gloves, table linens, etc., was entirely emptied. A few pair of boots and shoes were also taken, and probably hats and neekties found their way into the clutehes of the burglars. It is difficult for the firm to estimate its loss with any degree of correctness. It is probably between \$50 and \$150. There is no clew. The street lights were not burning that night and as Flanary went to Frankfort Monday, it was rather dark, the burglars had ample time to do their work in

Saloon Licenses.

Saturday Mr. T. N. Wofford, was in town to renew his application for saloon licenses at Ford's Ferry. There was considerable opposition t) the granting of there licenses, and the opposition was on hand with a Messrs. T. J. Nunn and F. M. petition. The parties agreed that Clement went to Madisonville Mon- there were 59 voters in the neighborhood, and upon comparison of Mrs. R. C. Walker left this morn. votes, it was shown that the objecing to visit relatives in Boone coun- tors had the names of thirty of these voters to their petition. Upon being convinced of this, Mr. Wofford Messrs Jno Sleamaker and Jas withdrew his petition. stating that in his case a majority should rule, and as the vote stood 30 to 29 against Mr. C.-J. Stamper and family, of him he would make no further fight. Mr. A. S. Hard, of Dycusburg, presented to the court a certificate from the Board of Trustees of Dycusburg, granting him a coffee house licenses with privilege ol retailing liquor by the drink. He paid the Mrs Nannie Moore, is spending State tax of \$100 to the court, and executed bond as the law requires. While Ford's Ferry on the Ohio Mr. S. A. WE ARE "IN IT" AT LAST

Buy your Farming Implements where you can buy them cheapest, even if you have to pat ronize your home merchants to do it.

Allow us to call your attention to the Finest

COMBINATION FARMING IMPLEMENT

Manufactured in this, the nineteenth century.

Cultivator and Seeder Combined.

The above cut shows the machine as a cultivator for corn, tobacco and other crops growing in rows. The fenders shown in the cut serve to protect the projecting leaves of the corn, tobacco, or whatever it may be, from injury. The driver comfortably seated regulates the sections with his feet, which rests in stirrups attached to each section. The sec tions are hung in such a manner as to permit of the freest oscillation. They may be readily moved from side by pressure from the operators foot; levers are geared to each section by which they may lowered or raised to cultivate deep or shallow, or locked securely in the desired position. To convert into a field harrow it is only necessary to remove the fenders and bolt on the center section. To convert into a seeder bolt on the seed box.

Three Machines in One,

And it is far superior to all other makes for the following reasons:

1ST-BECAUSE it's so much cheaper. 2ND-BECAUSE it's so much lighter draft.

3RD-BECAUSE it has such perfect center draft.

4TH-BECAUSE there is no weight on horse's neck.

5TH-BECAUSE of the regularity of the soed sower. 6TH-BECAUSE there is no jerking of the horse's neck

7TH-BECAUSE it is an ABSOLUTE FORCE FEED broad cast seeder.

BTH-BECAUSE the teeth are made from the best quality of highly tempered steel. 9TH-BECAUSE it has two levers instead of one, which enables the operator to lift one section over an

obstruction while the other cultivates. 10-BECAUSE it has a stout wood frame, well bolted, which is much better than a soft rod of iron, liable to get bent and out of shape.

Prepared for the National Columbian T IS now known to all readers that President snod a proclama-21 as the true an-

suitable exercises in all the schools of the United States. exercises of the World's Columbian exposition grounds in Chicago, will give an impressive unity to the popular celebration. Accordingly, when the super-intendents of education last February accepted the plan for this national pub-

lio school celebration, they instructed their executive committee to prepare an official programme of exercises for the day, nniform for every school. The following programme has been prepared by the committee: The schools should assemble at 9 a. m. lr

The schools should assemble at 9 a. m. In their various rooms. At 9:30 the detail of veterans is expected to arrive. It is to be not at the entrance of the pard by the color guard of pupils, escorted with dignity to the building and presented to the principal. The principal then gives the signal and he several teachers conduct their pupils to the yard, to drumbeat or other music, and arrange them in hollow square about the flag, the veterans and color guard taking places by the flag itself. The master of ceremonics then gives the command, "Attention!" and begins the exercises by reading the proclamation.

1. READING OF THE PRESIDENT'S PROC-LAMATION. By the Master of Cere-

At the ciose of the reading he announces: "In accordance with this recommendation by the president of the United States, and as a sign of our devotion to our country, let the flag of the nation be unfurled above this

2. RAISING OF THE FLAG. By the Vot-As the flag reaches the masthead the veterans will lead the assemblage in "Three Cheers for 'Old Glory.'"

8. SALUTE TO THE FLAG. By the Pupils.

At a signal from the principol the pupils, in ordered ranks, hands to the side, face the flag. Another signal is given; every pupil gives the flag the military salute-right hand lifted, paim downward, to a line with the forehead and close to it. Standing thus all repeat together slowly, "I pledge alieglance to my flag and the republic for which it stande; one nation indivisible, with liberty and justice for all." At the words "to my flag" the right hand is extended gracefully, paim upward, loward the flag, and romains in this gesiure till the end of the affirmation, whereupon all hands immediately drop to the side. Then, still standing, as the instruments sirike a chord, all will sing "America"—"My conntry, 'tis of thee." 8. SALUTE TO THE FLAG. By the Pupils.

4. ACRNOWLEDGMENT OF GOD. Prayer 5. Sono of Columbus Day. By Pupils and Audience.

A Porgotten Columbus Monument. It is a mistake to suppose that there was, np to a short time ago, no monument to Columbus in the United States. There is a monumental shaft in Balti more. It is obscurely placed and is inscribed "Chris. Columbus." It dates from 1784. It was erected by the French consul general, De Amamour, who, with some hundred or more French officers and soldiers, remained in Baltimore after the end of the Revolutionary war.

THE PRESIDENT'S PROCLAMATION

He Recommends the General Observance He Recommends the General Observance of Columbus Day on Oct. 21.

Whyreas, by a joint resolution, approved June 29, 1802, it was resolved by the senate and flouse of representatives of the United States of America in congress assembled, "That the president of the United States be suthorized and directed to issue a procimation recommending to the people the observance in all their localities of the 400th nuniversary of the discovery of America, on the 21st of October, 1802, by public demonstrations and by suitable easembly;"

exercises in their schools and other places of assembly:

Now, therefore, I, Benjamin Harrison, president of the United States of America, in pursuance of the aforesaid joint resolution, do hereby appoint Friday. Oot. 21, 1892, the 400th analyses agreement of the discovery of America by Colombia, as a general holiday for the people of the United States. On that day led the people of the United States. On that day led the people of the United States. On that day led the people of the themselves to such correless as may best express honer to the discoverer and their approximation of the great achievements of the four completed continues of American life. Columbia stood in his age as the pioneer of progress and shilightenment. This system of universal education is in our age the most grountest and salutary feature of the spirit of calightenment, and it is peculiarly appropriate that the schools be made by the people line centre of the day's demonstration. Let the national day float over every school house in the quintey, and the exercises be such as shall impress upon our youth the patriotic duties of American eftizenship.

In the chirectes and in the other places of assembly of the people let there be expressions of gratitudes to divine Providence for the devot faith of the discoverer, and for the divine gare and guidance which have directed our history and so ahundantly blessed our people.

In testimoup whereof I have hereunto set my hand and caused the seal of the United States be affixed.

One at the city of Washington, this states of July, in the year of our Lord one thousand

WITH MODERN SAILING VESSELS. The Wonder to the Mariner of Today Is How the Navigator Crossed the Ocean

in His Little Carnvel-A Faceimile for

COLUMBUS' FLAGSHIP COMPARED

Spain is now in the midst of a series tion naming Oct. of fetes in commemoration of the discovery of America which will last till niversary of the late in October. On the 8d of Angust, discovery of date of the sailing of Columbus from America, and Palos, the jubilation began, and of all recomine n ding the sights the exact reproduction of the its observance by flagship of Columbus, the Santa Maria, excited most amazement. Among the n all the schools of the United States.

A uniform programme for every school loud chorus of astonishment and unbein America, to be used on Columbus lief. Almost manimonsly they de-Day simultaneously with the dedicatory | clared that such a ship had not done the thing-It was impossible

It is indeed hard to believe that the ittle caravel of 240 tons at the outside conld have made such a voyage, and when one compares it with the large sailing vessels of today he may well be incredulons. With the achievements of steam and practical science we are tolerably familiar, but the fact then (though sailing vessels antedate written history, the progress therein since 1492 is as great as in anything olse) comes to one as a great surprise. Compare the little Santa Maria with; for Instance, the magnificent Shenandosh, the Ameriean four masted bark and queen of all salling vessels, which a few months ago with 5,002 tons of wheat on board.

went from San Francisco to Liverpool Consider first the big sailer. The Shenandoah, commanded by Captain Murphy, was one of the five which left the Bay of San Francisco last year on the famous race around the Horn. They sailed at high tide, of necessity, as they drew twenty-seven feet of water. The weight of wheat aboard, 5,002 tons, was the greatest cargo of the kind ever placed in a vessel and equivalent to 166,783 bushels, or the crop of an average agricultural county. An adequate description of the Shenandoah would fill a column. Sailer as she is, she 'makes sail by steam," as sailors saythat is, the sails are pulled into place by a little donkey engine, and of all glorions sights to the seaman's eye there is none more gloriens than to see her swell from bare poles to full rig of snowy sails in less than five minntes. The Santa Maris might have been placed on the deck of the Shenandoah without adding perceptihly lo her weight of cargo. She was a decked ves-

sel, and while the Spanish historians do not deal in exact measurements they are so minule in details of her capacity that her size is known. Captain Gustavus what you want; I have got W. Fox, after a very careful calenlation, declares that her length was "63 feet over all and 57 feet along her keel," with 20 feet beam and 10½ feet in depth. what you want, I will show Her erew consisted of fifty seamen, and in the list are found the names of one it to you. Englishman and one Irishman. It is really a pity that this list is not certainly anthentic; it would be interesting to know the name of the first Irish emlgrant to America. This historic vessel ladies, misses and children, the coast of Hispaniola, a calamity due I have in stock furs, feathwas wrecked on Christmas eve, 1492, on

Small as she was, her consorts, the Pinta and the Nina, were considerably smaller, being mero barks, called caravels, without decks, nuless the high prow and stern may be so called. In the

to the gross carelessness of the sailing

and in no respect superior to the fis craft and other light coasting vessels of today. That men should have been willing to dare the passage of the stormy Atlantic in such craft gives us a high idea of their courage, and as a matter of fact only Columbus, Las Casas, the Pinzons and two or three other mad enthusiasts were willing. The crew consisted chiefly of desperal characters compelled to take the trip. Many were released from prison to go, and some had been condemned to death and voluntered as a bare chance for life. Our astonishment is but slightly miligated when we read that Columbus did not ask for large vessels, for there were many in the Spanish ports larger than these. He firmly believed that the voyago would be comparatively short and the sea where he was going always smooth, and he particularly request

such vessels as would enable him to run close in along the shores and sail up the rivers. On his third voyage, when be actually reached South America, he complained of the size of his vessel, which rendered coast exploration dlfB The Spanish authorities declare that the Santa Maria of 1803 is no exact reproduction in every detail of that of

1403. It has the same old fashloned shape, the same primitlyo masts, riggings and sails, and even the same armament of falconets and mortars, halberds and arquebuses. The cabin of the Itch, Prairie Scratches, Sore Nipples commander is furnished in the style of and Piles. It is cooling and soothing. tical instruments of the period. Finally, its mastheads are decorated with the royal standards of Castille and Leon, in exact imitation of the flags which Co-lumbus planted in the New World on Oct. 12, 1402. The vessel is manned by an excellent crew, obtained from among the fishermen and sailors of Cudix and San Fernando, and placed under the orders of a detachment of officers of the royal navy.
